Slimmest profiles for doors and fixed glazings

FROM 23 MM. forster presto XS system allows flush-mounted, offset doors and fixed glazings to be installed in interior spaces in a wide variety of ways. The slim profiles allow intricate designs to be constructed to create an elegant, timeless look, while the high transparency of the glass elements ensures plenty of light is admitted to create a sense of spaciousness and comfort.

Profiles with minimal face widths from 23 mm are available to create modern looks or designs that will fit well in protected historic buildings. The newly developed range of profiles, matching accessories and fittings are easy, convenient and very safe to use.

The unique steel profiles made of 100 % steel are particularly durable and environmentally friendly because they are completely recyclable.
